SUMMARY

Information Technology undergraduate (B.Tech 2027) focused on AI/ML and backend systems, with experience building production-grade applications including a patented computer vision freshness detection system and a RAG QA engine using FAISS and ColBERT. Strong in DSA, system design, and scalable AI solutions.

EDUCATION

B.Tech - Information Technology - Easwari Engineering College
GPA: 8.3 / 10

2023 - 2027 | Chennai

PROFESSIONAL EXPERIENCE

Freelance Web Developer | SubbairH Tuition & Daycare [\[Documentation\]](#) 2025 | Chennai

- Developed and deployed a responsive website for a tuition/daycare center through a college referral
- Designed multi-page frontend interfaces including Home, About, Services, Blog, and Contact pages
- Implemented responsive UI/UX, mobile-friendly layouts, and interactive JavaScript components
- Delivered the project successfully as a paid freelance engagement worth ₹10,000

Tech: HTML5, CSS3, JavaScript, Responsive Web Design, Static Hosting

PROJECTS

AI-Based Freshness Indicator | [\[Patent No: IN202641004962 A1\]](#) | [\[DEMO\]](#):

- Built a CNN-based computer vision system using MobileNetV2, achieving 92% accuracy on 3,000+ fruit and vegetable images
- Designed a real-time prediction pipeline with shelf-life decay modeling for dynamic freshness scoring and spoilage alerts

Tech: Python, TensorFlow, Keras, OpenCV, Flask, React.js

Scholar RAG Engine | Retrieval-Augmented QA System | [\[DEMO\]](#):

- Developed a RAG pipeline with FAISS vector search and ColBERT-based late interaction retrieval for low-latency semantic search
- Improved answer precision by 30–40% using cross-encoder reranking; built FastAPI backend with Gemini API Integration

Tech: Python, FastAPI, FAISS, Sentence Transformers, ColBERT, React.js

Serverless URL Shortener | "Nag-Link" | [\[DEMO\]](#):

- Built a serverless URL shortener with custom slugs and <100ms redirect latency using edge functions
- Implemented Redis-based caching (Upstash), improving lookup speed by ~60% and ensuring high availability

Tech: Next.js, TypeScript, Redis (Upstash), Vercel

SKILLS

- Languages:** Python, Java, SQL, JavaScript
- Core:** OOPs, DBMS, Computer Networks, DSA
- AI/ML & CV:** TensorFlow, Keras, CNNs, Computer Vision, OpenCV, MobileNetV2, ColBERT
- Frontend:** React.js, HTML5, CSS3
- Backend & APIs:** Flask, FastAPI, RESTful APIs
- Databases:** MySQL, FAISS, Redis (Upstash)
- Tools & Technologies:** Git, Docker, Linux/CLI

CERTIFICATIONS

- Microsoft Certified:** Azure Developer Associate
- Cisco:** CCNA 1, 2, 3

ACHIEVEMENTS

- Published Indian patent (**IN202641004962 A1**) for an AI-based freshness detection system using computer vision and ML.
- SIH 2024 & SIH 2025 college-level finalist for AI based innovation projects.
- Worked with real clients on paid freelance projects, delivering production-ready software solutions.

CODING PROFILES

LeetCode: [naga_adarsh_s](#) - 670+ problems

CodeChef: [mr_snake_mr](#) - Div 2 (Rating 1700+)

Codolio: [fOaTXef](#) - 750+ total problems
