SUMMARY

Information Technology undergraduate (B.Tech 2027) focused on AI/ML and backend systems, with experience building production-grade applications including a patented computer vision freshness detection system and a RAG QA engine using FAISS and ColBERT. Strong in DSA, web development and scalable AI solutions.

EDUCATION

B.Tech - Information Technology - Easwari Engineering College **2023 - 2027 | Chennai**
GPA: 8.3 / 10

PROFESSIONAL EXPERIENCE

Web Developer | Eagle Hi-Tech Softclou Pvt Ltd **2025 | Chennai**

- Worked directly with clients to gather requirements and build 3 custom web pages, including 2 responsive HTML5/CSS3 sites and 1 dynamic React.js web page.
- Engineered responsive, cross-browser user interfaces using React components, state management, and modern CSS layout techniques.
- Delivered end-to-end web solutions on schedule, prioritizing clean component architecture, fast load times, and intuitive UI/UX based on direct client feedback.

Tech: React.js, HTML5, CSS3, JavaScript, Responsive Web Design.

PROJECTS

AI-Based Freshness Indicator | [Patent No: IN202641004962 A1] | [DEMO] :

- Built a CNN-based computer vision system using MobileNetV2, achieving 92% in F2 score on 3,000+ fruit and vegetable images
- Designed a real-time prediction pipeline with shelf-life decay modeling for dynamic freshness scoring and spoilage alerts

Tech: Python, TensorFlow, Keras, OpenCV, FastAPI, React.js

Scholar RAG Engine | Retrieval-Augmented QA System | [DEMO] :

- Developed a RAG pipeline with FAISS vector search and ColBERT-based late interaction retrieval for low-latency semantic search
- Improved answer precision by 30–40% using cross-encoder reranking; built FastAPI backend with Gemini API Integration

Tech: Python, FastAPI, FAISS, Sentence Transformers, ColBERT, React.js

Serverless URL Shortener | "Nag-Link" | [DEMO] :

- Built a serverless URL shortener with custom slugs and <100ms redirect latency using edge functions
- Implemented Redis-based caching (Upstash), improving lookup speed by ~60% and ensuring high availability

Tech: React.js , TypeScript, FastAPI, Redis (Upstash), Vercel

SKILLS

- **Languages:** Python, SQL, JavaScript, Java
- **AI/ML & CV**: TensorFlow, Keras, CNNs, Computer Vision, OpenCV, MobileNetV2, ColBERT
- **Frontend:** React.js, HTML5, CSS3
- **Backend & APIs:** FastAPI, SpringBoot, RESTful APIs
- **Databases:** MySQL, FAISS, Redis (Upstash)
- **Tools & Technologies:** Git, Docker, Linux/CLI

ACHIEVEMENTS

- Published Indian patent **(IN202641004962 A1)** for an AI-based freshness detection system using computer vision and ML.
- SIH 2024 & SIH 2025 college-level finalist for AI based innovation projects.
- Worked with real clients on paid freelance projects, delivering production-ready software solutions.

CERTIFICATIONS

- **Microsoft Certified:** Azure Developer Associate
- **Cisco:** CCNA 1, 2, 3

CODING PROFILES

LeetCode: naga_adarsh_s - **730+** problems
CodeChef: mr_snake_mr - **Div 2** (Rating **1700+)**
Codolio: fOaTXef - **870+** total problems
